Kelas: TI-1D

1. Percobaan pertama

Jawaban Pertanyaan Pertama

 Ketika diberikan input tahun 2100, maka outputnya kosong/tidak ada output. Cara agar outputnya Tahun 2100 bukan tahun kabisat, maka harus diberikan else dengan kode System.out.pintln("Bukan Tahun Kabisat")

2. Percobaan kedua

```
| Particular Color | Structure | Structure
```

```
PROBLEMS (2) OUTPUT DEBUG CONSOLE TERMINAL PORTS

3. Paket Bundling (Ricebowl + Ice Tea)

Masukkan angka dari menu yang dipilih =

3

Apakah punya member (y/n) ? =

n

Harga bundling = 15000.0

Total bayar = 15000.0

PS C:\Users\tuf gaming\OneDrive\Desktop\PRAKT_DASPRO\Minggu 6>
```

Jawaban Pertanyaan kedua

- 1. Fungsi .equalsIgnoreCase() = untuk membandingkan String tanpa memperhatikan besar kecilnya String/huruf.
- Fungsi .equals() = untuk membandingkan String dan juga memperhatikan besar kecilnya String/huruf .
 - Fungsi .equalsIgnoreCase() = untuk membandingkan String tanpa memperhatikan besar kecilnya String/huruf.
- 3. Fungsi nextLine() = untuk menghapus karakter newline (\n) yang dihasilkan saat pengguna menekan Enter setelah memasukkan angka.

```
 else if (member.equalsIgnoreCase(anotherString:"n")) {
    if (pilihon_menu = 1) {
        harga = 14000;
        System.out.println("Harga ricebowl = " + harga);
    } else if (pilihan_menu == 2) {
        harga = 3000;
        System.out.println("Harga ice tes = " + harga);
    } else if (pilihan_menu == 3) {
        harga = 15000;
        System.out.println("Harga bundling = " + harga);
    } else {
        System.out.println("Harga bundling = " + harga);
        return;
    }

    System.out.println("Total boyar = " + harga);
    if (pembayaranDigital.equalsIgnoreCase(anotherString:"QRIS")) {
        harga -= 1000;
        System.out.println("Jodi total keseluruhannya adalah = " + harga);
    }
} else {
        System.out.println(x:"Member tidak valid");
}

System.out.println(x:"Member tidak valid");
}
```

3. Percobaan Ketiga

```
### President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/Pr
```

Jawaban pertanyaan Ketiga

- 1. Fungsi (int) adalah mengcasting tipe data double ke int, jenis casting ini disebut Narrowing casting
- 2. Outputnya akan true, dikarenakan fungsi dari equalsIgnoreCase adalah untuk membandingkan String tanpa memperhatikan besar kecilnya String/huruf.
- 3. Outputnya akan else, dikarenakan fungsi equals adalah untuk membandingkan String dan juga memperhatikan besar kecilnya String/huruf .
