```

2. Percobaan kedua

```
| Personal Processes | Personal Content | Personal Processes | Personal
```

```
PROBLEMS ② OUTPUT DEBUG CONSOLE TERMINAL PORTS

Masukkan angka dari menu yang dipilih -
3
Apakah punya member (y/n) ? -
y

Besar diskon - 10%
Harga bundling = 15000.0
Total bayar setelah diskon - 13500.0

PS C:\Users\tuf gaming\OneDrive\Desktop\PRAKI_DASPRO\Minggu 6>
```

```
PROBLEMS ② OUTPUT DEBUGCONSOLE TERMINAL PORTS

3. Paket Bundling (Ricebowl + Ice Tea)

Masukkan angka dari menu yang dipilih = 3

Apakah punya member (y/n) ? = n

Hanga bundling = 15000.0

Total bayar = 15000.0

O PS C:\Users\tuf gaming\OneDrive\Desktop\PRAKT_DASPRO\Minggu 6>
```

Jawaban Pertanyaan kedua

- 1. Fungsi .equalsIgnoreCase() = untuk membandingkan String tanpa memperhatikan besar kecilnya String/huruf.
- 2. Fungsi .equals() = untuk membandingkan String dan juga memperhatikan besar kecilnya String/huruf .
 - Fungsi .equalsIgnoreCase() = untuk membandingkan String tanpa memperhatikan besar kecilnya String/huruf.
- 3. Fungsi nextLine() = untuk menghapus karakter newline (\n) yang dihasilkan saat pengguna menekan Enter setelah memasukkan angka.

```
} else if (member.equalsIgnoreCase(anotherString:"n")) {
    if (gliihnn.menu == 1) {
        harga = 16000;
        System.out.println("Harga ricebowl = " + harga);
    } else if (pliihnn.menu == 2) {
        harga = 3000;
        System.out.println("Harga ice tea = " + harga);
    } else if (pliihnn.menu == 3) {
        harga = 15000;
        System.out.println("Harga bundling = " + harga);
    } else (
        System.out.println("Harga bundling = " + harga);
    }
    system.out.println("Total bayar = " + harga);
    if (pembayaranDigital.equalsIgnoreCase(anotherString:"QRIS")) {
        harga = 1000;
        System.out.println("Jadi total keseluruhannya adalah = " + harga);
    }
} else {
        System.out.println(x:"Member tidak valid");
    }

    system.out.println(x:"Member tidak valid");
}
```

```
Apakah punya member (y/n) ? =

y
Apakah pembayarannya menggunakan QRIS/Tunai =
qris

Besar diskon = 10%
Harga bundling = 15000.0
Total bayar setelah diskon = 13500.0
Jadi total keseluruhannya adalah = 12500.0

PS C:\Users\tuf gaming\OneDrive\Desktop\PRAKT_DASPRO\Minggu 6>
```

3. Percobaan Ketiga

```
### President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/President/Pr
```

Jawaban pertanyaan Ketiga

- 1. Fungsi (int) adalah mengcasting tipe data double ke int, jenis casting ini disebut Narrowing casting
- 2. Outputnya akan true, dikarenakan fungsi dari equalsIgnoreCase adalah untuk membandingkan String tanpa memperhatikan besar kecilnya String/huruf.
- 3. Outputnya akan else, dikarenakan fungsi equals adalah untuk membandingkan String dan juga memperhatikan besar kecilnya String/huruf .

Tugas
